- Can facilitate unloading/loading a trailer in less than 30 minutes
- FIFO/LIFO applications

- Warehouse management system by Highump

## IMPORTANT QUESTIONS TO ASK WHEN EVALUATING A 3PL PARTNER

### DO I NEED SHARED SPACE OR DEDICATED SPACE?

This is the most critical question to answer when beginning the process of selecting a 3PL partner. Sharing space makes warehousing more affordable and is ideal for new, smaller companies or companies that have maxed out their current space and have temporary or intermittent overflow needs. Get what you need when you need it. Goshen Logistics only offers shared operations.

### IS THE SPACE SUITED TO MY NEEDS?

It's essential to understand the capabilities of the warehouse space and your needs. If you don't need a temperature-controlled space, there is no reason to spend the extra cost on a space with that specific setup. Additionally, if you are storing food or consumables, understanding what else is stored in the facility to avoid potential conflicts and maintain a safe environment for your goods. Goshen Logistics only offers food and beverage storage.

### IS THE SPACE SCALABLE?

If your business is growing quickly, it's extremely important to understand the scalability of the warehouse. If you think you'll need more space and the warehouse can't accommodate your future needs, you'll be starting the process of finding a 3PL partner all over again.

### IS THE COMPANY STABLE?

Goshen Logistics is an affiliate of Kenover Marketing Company, one of the leading distributors of specialty foods in the USA.
